

Let your guests

Sleep like a baby . . . enjoy peace and quiet

Stop the Noise

Stop the Noise Complaints

- **Stop outside noises by 75-95%**
- **Get ZERO noise complaints**
- **Improve your returning customer numbers**
- **Be the quietest hotel in your market**
- **FREE – Paid for with proven energy savings**

Our product is simple. We ADD a window to your existing window. However, OUR window is designed to stop noise. We reduce noise levels by 75-95% while increasing the room comfort and cutting your utility bills. Replacing your windows will not reduce your noise levels very much (if any) and is unlikely to provide more energy savings than adding our windows. Even if you have very energy efficient windows, we can improve their insulation values and cut your energy bills even more. Installation is quick – 1 to 2 hours per room. We ship and install anywhere in the country. Talk to us about your problems and let us help you cut your costs while soundproofing your hotel.

We also have sliding glass doors !!!

*Four Diamond 144 room 11-story hotel in downtown Houston. Results from a one year detailed study. The hotel has electric air conditioning, natural gas heating and dual pane windows. Tests includes all utilities for hotel operations. Energy usage tracked following installation from September 2007 thru August 2008 compared to the same months of previous year.
